CIO Healthcare Summit Partners with Healthcare IT News

November 11, 2010 – The CIO Healthcare Summit team announced today that it has formed a strategic partnership with Healthcare IT News, which provides readers with information on IT strategies and tactics, statutory and regulatory issues, as well as provider and vendor updates on its website, www.healthcareitnews.com.

The CIO Healthcare Summit, April 3-6, 2011 in Scottsdale, Arizona, is a unique opportunity for CIOs and healthcare IT leaders to network with their peers, attend educational sessions, and learn about new IT solutions. The event's strategic agenda features open forums, CIO think tanks, and panel discussions, all of which encourage attendees to have in-depth discussions on the topics presented throughout the event.

This year's CIO Healthcare Summit will focus on the road to meaningful use and will feature end-user led agenda sessions on EHR/EMR systems, security considerations for electronic health records, storing and securing digital patient data, and improving patient care through mobility.

"The healthcare industry is experiencing drastic changes and it is imperative for technology executives to stay up-to-date on the latest industry news. I am excited by our recent partnership with Healthcare IT News, as this publication provides truly valuable information that is pertinent to all industry professionals," said Mark Southam, Event Director, CIO Healthcare Summit.

Healthcare IT News, published in partnership with HIMSS, provides readers with an event calendar, job listings, whitepapers, podcasts, videos and in-depth articles on payers, vendors, physician practices, hospitals and IDNs. Along with a newsletter, blog, social media presence and monthly publication, Healthcare IT News provides readers with unparalleled coverage of the healthcare IT industry and was an American Society of Healthcare Publication Editors 2010 winner gold winner for best website.
